Dongguan Ketuo Electronic Technology Co., Ltd. has been rooted in Dongguan, the "world manufacturing center", since 2012. It has been deeply involved in the fields of automobiles, motorcycles, electric vehicles, and bicycle accessories for more than ten years, and has now developed into a high-tech enterprise integrating research and development, production, sales, and technical services. The company focuses on high-end cycling equipment products, forming a main product line with cycling stands, cycling chargers, helmet Bluetooth earphones, and helmet driving recorders as the core, providing global customers with one-stop services from product customization and development to technical solutions.

Relying on advanced manufacturing systems and professional R&D teams, Koto Electronics has established a rigorous full process quality control system. The company has taken the lead in passing the ISO9001:2015 quality management system, and its products have obtained international authoritative certifications such as CE, FCC, and ROHS. It has also obtained dozens of utility model patents and design patents, driving product quality upgrades through technological innovation.

With excellent product performance and stable quality performance, the company's independent brand "YueMai" has established a good reputation in domestic and foreign markets, becoming a trustworthy high-quality brand in the industry.

The company adheres to the core values of "integrity, professionalism, innovation, and win-win", constantly pursuing excellence, leading a healthy lifestyle, and creating greater value for society! Welcome friends from all walks of life around the world to join hands and create a better future, and live a healthy life together!

Development Plan

❖ Market
Situation

❖ Strategy
Plan

Market Situation

M A R K E T

1. The global aftermarket size for auto parts is \$983 billion, expected to reach \$1370 billion by 2030, with a compound annual growth rate of 3.38%. The compound annual growth rate for motorcycle supplies is 5.5%
2. The scale of e-commerce sales is expected to reach 292.6 billion US dollars by 2030, with a compound annual growth rate of 20%. The proportion of e-commerce sales is expected to increase from 4% to 20%

&

1. Strong attachment to the vehicle models and single channel
2. No core technology
3. Serious homogenization of products and frequent occurrence of vicious competition
4. Unreasonable export product structure, low export share of high-tech and high value-added products
5. Weak export after-sales service

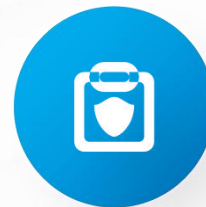

S I T U A T I O N

Strategy Plan

Continuous Development on Auto Accessories Markets

Requirements of outdoor life;
New chance brought by new energy car;
Actively explore overseas markets;

Adhere to high-end and differentiated products

Positioning high-end cycling equipment
Enrich product portfolio
Enhance customer experience
Improve sales revenue and new product return rate

Leading QC Passing Rate

Smart Products $\geq 99\%$
Structure Products $\geq 99.8\%$

Service & Commitment

Timely, thoughtful,
enthusiastic, and efficient
